

PROTEIN SOURCES MILLING FALL PRICE
LATER POLICY FOR NEW CROP 2025 CORN AND SOYBEANS

Grain that is not forward contracted or priced the day of delivery will incur a .25 per bushel drop fee. Any grain that is not priced by January 1st, 2026 will be assessed a .05 per month handling fee in addition to the drop fee which will be prorated per day. Grain not priced by the producer by August 28th, 2026 will be priced at the closing bid for that day. **Protein Sources will try to accommodate all incoming grain but reserves the right to only receive grain that is forward contracted, sold on a minimum price contract, or straight cash sale.**

PROTEIN SOURCES MINIMUM PRICE CONTRACT
PROGRAM FOR 2025 FALL DELIVERED CORN.

If the producer wishes to have a chance to participate in a higher cash price that may be available at a later date PSM can write a minimum price contract. That will be accomplished by selling the grain for cash at delivery and PSM would buy the right to reprice for a future month on the producer's behalf. The price of the call will be deducted from the cash settlement. At any time before option expiration the producer can exit the call position and PSM will issue a check for what it was sold for to the producer. This process guarantees that the producer will never receive any less than the initial settlement price and chance to take advantage of any post harvest rally. PSM charges a .05 per bushel fee for this service which will be deducted from the original settlement.

If you have questions or would like more information on the minimum price program please contact one of the following Protein Sources employees.

Dan FitzSimmons 507-380-5787

Dan Sohre 507-420-4151
